

专注皮革厚料缝纫机的研发制造

FOCUS THE DEVELOPING AND PRODUCING AND  
MANUFACTURING OF LEATHER THICK MATERIAL SEWING MACHINE

# AK-82891DW/82892DW

## 直驱式全自动单/双针罗拉车

(可选剪线、倒针、自动抬压脚功能)

Direct Drive Auto Post-bed, lockstitch  
Sewing Machine

- **最新主轴直驱马达系统;**  
The latest spindle direct-drive motor system;
- **优秀的高速性能和针刺透力, 强化车缝力度;**  
Excellent high speed performance and needle through force,  
Strengthen the sewing strength:
- **优越的机械性能, 确保了更长的使用寿命;**  
The superior mechanical properties, it ensures a longer service life :
- **定位、剪线、倒针等多种功能, 大大提高工作效率;**  
A variety of functions such as tacking, trimmer, back stitch, greatly  
improve the working efficiency:
- **节能省电, 经济实用;**  
Power saving, economic and practical:
- **提高了安全性能;**  
Improve safety performance:

## 投资效益分析

INVESTMENT BENEFIT ANALYSIS

- 旧模式: 按每条生产线配置100台普通罗拉车计算约需40万人民币, 工人工资约需100人\*3000元/人月\*12个月=360万/年。
- 新模式: 采用本佳牌自动化罗拉车可提高30%以上效率, 只需配置70台罗拉车约需90万; 70个工人工资约需250万元/年。
- 每年节省工资约110万!! 而设备投资一次性增加90万-40万=50万, 仅需半年即可收回! 一年即可新增现金利润110万元!!!
- 其他增加效益: 伺服电控能把电费节省50%以上; 自动剪线可以节约用线30%以上。; 管理费用、财务费用、厂房宿舍等固定资产投资费用同时得到大幅度的节省。
- Old model: 100 units per production line configuration of ordinary roller car calculation about 400000 yuan, workers need about 100 \* 3000 yuan/month = 3.6 million \* 12 months/years.
- New model: using the preferred brand automatic roller car can improve the efficiency of more than 30%, only need to configure 70 Laura car about 900000; 70 workers need about 2.5 million yuan/year.
- Save a year salary of about 1.1 million!!!!!! As a one-time increase equipment investment 900000-400000 = 500000, only half a year to pay! Can new cash profit of 1.1 million yuan a year!!!!!!!!!!!!
- Can other increase benefits: servo control electricity saving more than 50%; Automatic trimming can save more than 30% with lines. ; Management fees, financial costs, investment in fixed assets, such as workshop, dormitory fee at the same time get big savings.
